

Your Reconditioned Paper Cutter Specialists

Sydney Stone understands that buying pre-owned equipment provides your business with a more affordable option. We currently maintain one of the largest inventories of reconditioned small format finishing equipment in Canada. We are proud of our on-site rebuild centre, which allows us to properly assess, clean and fully recondition the equipment back to its factory tolerances. Our technicians are factory trained and spend the time to ensure that you receive a machine that is ready for the rigours of current on demand production requirements.

Sydney Stone does not stop at the reconditioning process. All machines come with a complete set of accessories, tools and manuals that would have been supplied with a new machine.

Warranty

Our pride of workmanship is reflected in the warranty provided on all our reconditioned machines. With many machines being available through brokers and online auction, our in stock parts supply and fully trained service staff allow us to stand behind this commitment. This is the protection that buying from Sydney Stone provides.

ASK US ABOUT OUR TRADE IN PROGRAM

Dull knife cutting down productivity?

YOU KNOW THAT YOUR PRINTER IS THE LIFEBLOOD OF YOUR SHOP, BUT DID YOU KNOW THAT AN EFFICIENT PAPER CUTTER IS THE NEXT MOST IMPORTANT PIECE OF EQUIPMENT YOU HAVE?

Your paper cutter likely touches just about every job that leaves your facility, from business cards to booklets to brochures. A good sharp blade will help keep your cuts clean, straight and square, as well as minimize wear on the hydraulic and / or mechanical components of your machine. Preventative maintenance from Sydney Stone, including regular blade changes, will help prolong the life of your machine and keep you producing beautifully-finished print projects for years to come. Learn more about Sydney Stone's Blade Change Programs at printfinishing.com/blade-change-program/

PROGRAM DETAILS

- Remove and replace dull knife with sharp knife
- Squaring and recalibration of backgauge
- Lubrication of cutter
- Rotation / replacement of cutting stick
- Includes knife sharpening

Meet the Owners

"We decided to move up from our 26.6" cutter and have no regrets. The air table is also an added bonus; we don't know how we survived without one!"

HAROLD MACDOUGALL
EVERYDAY PUBLICATIONS
Installation of Mohr D80 ECO Paper Cutter

With increasing demand for larger sheet sizes and heavier stock weights, Kroman realized they actually needed something bigger than 18.7" in order to keep up with our customers' needs. After discussing the company's long-term goals, they opted for the EBA 5560 21.6" cutter.

KLOMAN STUDIO
Installation of EBA 5560 Paper Cutter

When their 50-year-old cutter made its final cut and they were unable to source the parts needed to repair it, Hanover Typocraft needed a new solution. "From discussing the options, to the demo and the final installation and training, Sydney Stone exceeded our expectations."

Hydraulic Paper Cutters

21.6" 5560 / 5560 LT

Clamping:	Hydraulic, up to 4000 PSI
Cutting:	Hydraulic
Backgauge:	Touch Screen Programmable
Security:	Photocell Guard
Cutting Width:	21.6"
Cutting Height:	3.75"

The **EBA 5560 Paper Cutter** is the most powerful cutter in its class. Offering a 21.6" cut width and with fully adjustable clamping pressure, the EBA 5560 will cut an astonishing 3.75" of paper with ease. The fully programmable touch screen backgauge control with 99 programs (99 steps each) drives a hydraulically powered high speed cutting knife. A unique multiple cut programming function allows simple creation of programs for the accurate cutting of business cards and other multiple-up applications. The front table surface is protected by a photocell safety system. Soft foot pedal for pre-clamping, LED cut line light and false clamp plate are standard features. The EBA 5560 LT offers all the above benefits along with an air table to allow easy movement of paper.

28" 7260 LT

Clamping:	Hydraulic, up to 4400 PSI
Cutting:	Electro-mechanical
Backgauge:	Programmable
Security:	Photocell Guard
Cutting Width:	28"
Cutting Height:	3"

The **EBA 7260 LT Paper Cutter** offers the convenience of a 28" cutting width, coupled with the same ease of operation and performance as EBA's smaller cutting machines. Its fully programmable backgauge control with 99 programs (99 steps each) also features repeat cut, eject and memory functions. The front table surface is protected by a photocell safety system allowing a larger efficient workspace. Features such as large side tables, an LED optical cutting line light, air table, fast knife cycle and advanced programming capabilities make this the perfect cutter for the commercial digital printer. The EBA 7260 paper cutter will make quick work of all your paper cutting needs.

MOHR Hydraulic Paper Cutters

 **MOHR D 66** 26.4" Paper Cutter

Cutting Width:	26.4"
Cutting Height:	3.15"
